

Autumn New Items 2018

PIKO

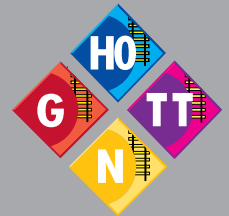

Photo: RailAdventure

Highlights of the electric locomotive BR 111 in RailAdventure design:

- finest painting and printing
- heavy zinc die-cast frame
- separately applied detached handle bars and handles
- delicate windscreen wipers, pantographs and electric isolators
- digital switchable lighting for the driver's cabin, the rear lights and the engine room
- strong 5-pole motor with two oscillating weights
- high traction due to the 2 traction tyres
- PluX22 interface for an easy upgrade with a decoder and sound

Since March 2018 the locomotives no. 111 210, 215 and 222 of the series BR 111 are used for locomotive transportation service for the Munich company RailAdventure in Germany and abroad. The PIKO model shows the exact details of this exotic locomotive.

51848 Electric Locomotive BR 111 RailAdventure VI

51849  Electric Locomotive BR 111 RailAdventure VI, 3 Rail AC, incl. mfx capable decoder

suitable accessories for BR 111 electric locomotive:

56372 PIKO Sound Decoder Kit w loudspeaker (see main H0-catalog 2018 page 419) /

56400 PIKO SmartDecoder 4.1 PluX22 multiprotocoll (see main H0-catalog 2018 page 34) / # 56401 PIKO SmartDecoder 4.1 PluX22 mfx (see main H0-catalog 2018 page 34)

Picture shows actual size of the model

Highlights of the diesel locomotive Vectron

BR 247 in SyltShuttle design:

- finest painting and printing
- heavy zinc die-cast frame
- sharply engraved bogies
- white/red LED light variation
- strong motor with two oscillating weights
- high traction due to the 2 traction tyres
- profiled wheel discs
- model can be upgraded with a sound decoder and speakers

Since the beginning of 2018 the extremely silent and efficient diesel locomotives of the type Vectron DE are used for the motorail service to the island of Sylt.

reference: Kombiverkehr

The Kombiverkehr version of the electric locomotive of the series 185.2 is the ideal locomotive for the PIKO pocket car T3000e (see page 7 in this flyer)

54777

This sides of the loco are printed like in the original with different decorations.

59154 Electric Locomotive BR 185.5 Kombiverkehr VI

59054  Electric Locomotive BR 185.5 Kombiverkehr VI, 3 Rail AC, incl. load-regulated decoder

Highlights of the electric locomotive 185.2 in the attractive Kombiverkehr-design:

detailed painting and lettering • die cast frame • separately attached handrails • directional LED lighting white/red • motor with two flywheels • 2 traction tires for more pulling power • NEM 652 DCC decoder interface • prepared for speaker and sound module

suitable accessories - sound module for BR 185.2:

56193 PIKO Sound Kit - use w/decoder # 56121 (see main H0-catalog 2018 page 420) / The sound module must be directly connected to the # 56121 digital decoder.

Highlights:

- finest painting and printing
- heavy zinc die-cast frame
- separately applied detached handle bars and handles
- realistic ventilator grills and flaps
- strong motor
- harply engraved bogies with detailed axle bearing caps and suspension elements
- model can be upgraded with a sond decoder and speakers

 **59270 Diesel Locomotive SM42-733 PKP Cargo VI**

suitable accessories for SM42 PKP diesel locomotive:

56121 PIKO Digital Decoder 8-pole (NEM 652) w sound interface (see main H0-catalog 2018 page 421)

*with realistically faded
colour patches*

59941 Diesel Locomotive BR 119 DR IV

Highlights of the diesel locomotive BR 119 in an attractive patch design:

finest painting and printing • heavy zinc die-cast frame • realistic round buffers • ribbed battery boxes • white/red LED light variation • strong motor with two oscillating weights • high traction due to the 2 traction tyres • digital interface after NEM 652 standards • model can be upgraded with a sond decoder and speakers

suitable accessories - sound module for BR 119:

56347 PIKO Sound Decoder Kit - use w/decoder # 56121 (see main H0-catalog 2018 page 419) / The sound module must be directly connected to the # 56121 digital decoder.

 55056 PIKO SmartMeasure Car NL,
DC/AC und analog, VI

 55057 PIKO SmartMeasure Car FS,
DC/AC und analog, VI

With the innovative PIKO SmartMeasure Car it is possible to measure the entire installation – down to the very last centimeter as well as to the very last per mil in case of ascents! In connection with a mobile App (*Android) or a PC, the measured data and information can be displayed live by means of WLAN. This way, it is possible to also perform exact measurements in not visible installation areas. An Italian and a Dutch version of this hightech model will be available by fall 2018.

Colourful art out of the can. Graffities are an iseperable part of the daily image of modern railways. The PIKO set consists of two tarpaulin cars which are emprinted with realistically and elaborately designed graffities.

The two sides of each car are printed with different decorations.

58362 Set 2x Tarpaulin Car DB AG VI, weathered

56061

The chemical tank car, which is equipped for the transport of chemicals of all kinds with a tank made of chromium-nickel steel (V4A) is an indispensable and modern means of transport for many plants of the chemical industry. These cars have insulation and a heating and thus are capable to transport a variety of substances.

PIKO SmartDecoder 4.1 Sound
for E-Loco BR 147

The PIKO N- and TT-scale models of the side dump cars Falns of the Niederrheinische Verkehrsbetriebe AG are characterized by their realistic form, colouring and printing. The models are equipped with reliable close coupling systems and all the details of the original. Handle bars and handwheels as well as brakeman's platforms are delicately realized and separately detached.

38761 Christmas Good List Auto Transport

38762 Christmas Tree Express Low-Side Gondola

38884 Christmas Boxcar 2018
(only produced once)

With the V36, PIKO offers G-scale enthusiasts a very versatile locomotive, that can be used in front of passenger and freight cars. The PIKO model is motor driven on all three axles. The jackshaft with its rotating counterweight between the second and third axle is one of the many highlights of the locomotive. The model is equipped with the typical shutters and fan grilles of the original as well as the separately applied detached railings and lanterns. It is prepared for the addition of a digital decoder and diesel sound unit.

37813 Hermann Christmas Bear Car

37532 Diesel Locomotive V36 DB III, with cockpit

For prototypical sound use the PIKO sound kit #36224 (see main G-catalog 2018 page 118) in conjunction with the PIKO loco decoder #36122 (see main G-catalog 2018 page 115).

PIKO SmartControl_{light}

PIKO
SMARTCONTROL_{light}

Clearly arranged display

Full DCC compatibility with
14, 28 and 128 regulating steps

Ergonomic hand controller

Up to 20 locos individually controllable at the same time

THE ECONOMICAL, EASY-TO-USE
DIGITAL CONTROLLER BY PIKO –
FOR BOTH BEGINNERS AND
EXPERIENCED HOBBYISTS

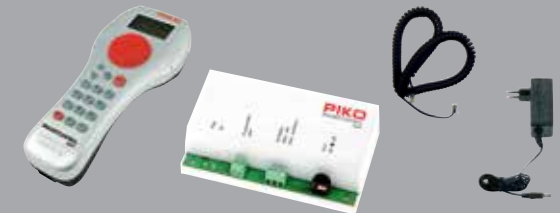

The attractive starter sets with realistically compiled trains are the ideal opportunity to enter the digital world of PIKO SmartControl_{light}

**59006 SmartControl_{light}
Starter Set DB AG
ICE 3 VI**

The PIKO SmartControl_{light} system is also available as part of many attractive H0 starter sets with an excellent price-performance ratio. The included robust and detailed models paired with the well thought out track systems make for a perfect start into the world of digital model railway systems and guarantee long lasting fun!

The PIKO Basic Set SmartControl_{light} # 55017 includes:
PIKO SmartController_{light}, PIKO SmartBox_{light}, Power adapter 16 V / 32 W,
Spiral connection cable and Quick Manual.

The PIKO SmartController_{light} is also available separately under # 55016.

LEGEND:
